About

Over 2+ years of Experience in learning, building, and implementing in Frontend development. Coding addict, JavaScript enthusiast, UI lover. Trying hard to make clean, responsive UI interfaces and achieve UI patterns that maximize code reusability and scalability,

I'm curious about exploring new technologies that make a happy user experience and a happy developer experience; I do so by keeping my eyes on the new tools, reading articles, and watching videos. I enjoy writing technical things 🍌 on my social media accounts.

Education

Cairo University

BS From faculty of commerce

2020 - 2024 (Not attending)

Military state

Exempted

Skills

Development

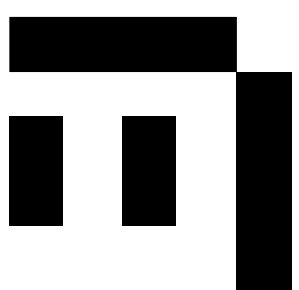

HTML, CSS, Git/Github, JavaScript(es6+),
Reactjs, React hooks, Redux, Redux toolkit,
